Overview

- **5kph speed limit**
- No 'L' or Red 'P' Platers allowed in Kiss and Drop Zone at anytime
- Pittwater House may deny access to people who do not comply with these conditions.

Kiss and Drop Zone

- **This area of the school is used as a safe open space for students and at specific times converts to a Kiss and Drop Zone controlled by staff.**
- **Drivers are to remain in the vehicle at all times.**
- **This area is also a no parking zone at all times.**
- Pittwater House Staff on duty are there for safety reasons and to assist with the smooth running of the Kiss and Drop Zone. Please follow their instructions. The staff will not be able to discuss any unrelated issues at this time as they will be concentrating on student safety. Parents who do not follow the instructions of the staff in attendance may be refused further access to the South Creek Road Kiss and Drop Zone.
- Pittwater House School will be working hard to have students ready for Pick Up at the correct times. Lessons conclude at 3:00pm, 3:10pm, 3:20pm and 3:25pm. It will then take time for the students to be organised and dismissed. If the day's end is 3:00pm, the earliest the students should be expected to be at the Kiss and Drop Zone is 3:05pm. If the day's end is 3:20pm the earliest the students should be expected to be at the Kiss and Drop Zone is 3:25pm.
- Please do not arrive prior to these times.
- Kiss and Drop is designed to be a safe method for students to be dropped at and collected from school. To help traffic flow on neighboring roads, please ensure that students are ready to leave the car with no last-minute clothing adjustments needed, their bags packed, and all arrangements made. Then at the drop off, they will only need their seatbelt released and then they can exit the car from the building side of the vehicle.
- Pittwater House School has a "No Boot" policy for safety reasons and to keep the Kiss and Drop Zone flowing. We want to avoid students and teachers having to step out into the roadway to access the boot of the car as well as avoiding the additional time this takes, which when multiplied by all the cars, adds to the time taken for all cars to move through the car park.
